

**all, ball, tall, call, wall, fall, hall,
mall, stall, small, etc.**
Student sentences may vary.

Structural Analysis

Word families

When your students run out of ideas, give them hints for other words. Example: "An elephant is very, very big and an ant is very, very _____." Be sure students understand that they can look for smaller words like "all" in bigger words. This strategy will help them when they come to unknown words in their independent reading.
