

Possible Answers: one of the most popular foods in the U.S.; 1890 high protein patients; invented by 2 doctors - Michigan, Missouri; 40 million people eat it in the U.S.; 800 million pounds per year

Review what "take notes" means. Many of your students have been practicing this skill since third grade in their writing instruction. Taking notes means to write down words or short phrases that will jog your memory to think of even more information. Notes are used to write reports or short articles, study for tests, etc. Your students will use these notes and others in Activities 74 and 75.
