Name

Use the lines below to take notes from this part of an article about peanut butter.

Peanut butter is one of the most popular foods in the United States. It was invented by two different doctors - one in Michigan and one in Missouri. Each doctor was working by himself and in 1890 developed this high-protein food for their patients. Today, in the U.S., 40 million people eat peanut butter each day. That adds up to about 800 million pounds of peanut butter a year!
