

Explore India

India is a very big country in southern Asia. More people live in India than in any other country except China.

India's landscape is full of contrasts. There are great rivers, mountains, plains, deserts, and tropical rain forests.

India has a large technology industry. These children are learning how to use a computer.

The capital city of India is New Delhi. It was carefully planned when it was built in the early 1900s. New Delhi replaced Delhi as India's capital in 1931. The cities are just 3 miles apart.
